COVID Vaccine Misinformation: Hot Topics

May 28, 2021

CDC24/7

Agenda

Introduction

Hot Topics

1. SM-102 Vaccine Ingredient Safety
2. Magnetism Rumor
3. Vaccine Male Infertility/Fertility Issues Rumor

LOGISTICS

Next Meeting Date:

- To be announced

Point of Contact:

- Want a follow-up meeting to discuss information presented? Contact **Carol Crawford** [REDACTED]@cdc.gov).

Centers for Disease
Control and Prevention
Office of the Director

DRAFT - THIS INFORMATION IS NOT FOR FURTHER DISTRIBUTION

ADVISORY

Misinformation has been identified about the safety of COVID-19 vaccine ingredients.

Please **Be On the Lookout** for: Statements, pictures, posts, or messages containing misinformation that the Moderna vaccine is unsafe due to the ingredient SM-102.

When May 2021

Where Digital Platform(s): All.

Status Following the publication of a Moderna COVID-19 fact sheet, there have been false claims that the vaccine ingredient SM-102 listed is poisonous and unsafe for humans.

Potential Impact Reduced vaccine acceptance.

The Facts The manufacturing process and controls have been well characterized and qualified. The analytical procedures developed and used for the release and stability monitoring of mRNA 1273 Drug Substance (DS) and Drug Product (DP) include tests to ensure vaccine safety, identity, purity, quality, and potency.

Example post

BREAKING: Moderna COVID Vaccine Found to Contain a DEADLY POISON "SM-102 – Not for Human or Veterinary Use, Acutely Toxic, Fatal in Contact with Skin, Carcinogenic, Causes Infertility, Causes Nerve, Liver, Kidney Damage" – The EveryDay Concerned Citizen

ADVISORY

Misinformation has been identified about the COVID-19 vaccine ingredients and related side effects.

Please **Be On the Lookout** for: Statements, pictures, posts, or messages containing misleading or false information that vaccine ingredients cause vaccinated individuals to become magnetic.

When May 2021

Where Digital Platform(s): All.

Status Videos shared widely on social media platforms claim to show individuals becoming “magnetic” after receiving the vaccine, further fueling the false claim that vaccines contain microchips.

Potential Impact Reduced vaccine acceptance.

The Facts COVID-19 vaccines are safe and effective. COVID-19 vaccines were evaluated in tens of thousands of participants in clinical trials. The vaccines met the FDA's rigorous scientific standards for safety, effectiveness, and manufacturing quality needed to support emergency use authorization.

#magnetgate:
I've seen many videos now about this. Is this bigger than we think?

THE MAGNETISM FROM THE VACCINE REPORTEDLY SPREADS THROUGHOUT THE BODY OVER TIME.

As the self-reproducing nano particles gradually take over. And metal objects as well as magnets will also stick to you. Here in Spain.

Guys WTF is this?

ADVISORY

A **rumor** has been identified regarding COVID-19 vaccines effects on male fertility.

Please **Be On the Lookout** for: Statements, pictures, posts, or messages containing misinformation that vaccines cause infertility or other fertility-related issues in men.

When April 2021 – Present

Where Digital Platform(s): All.

Status Recently, social media posts have falsely speculated that men should not have unprotected sex after receiving the Pfizer COVID-19 vaccine, as the “spike protein” from the virus could allegedly damage the individual’s sperm or cause infertility.

Potential Impact Vaccine hesitancy and reduced vaccine acceptance.

The Facts COVID-19 vaccines are safe and effective. Millions of people in the United States have received COVID-19 vaccines under the most intense safety monitoring in U.S. history.

Absolute LIES. Women aren't ovulating, even fertility clinics are reporting embryos are not growing properly and sperm counts of vaccinated men have dropped right down. Women are experiencing the most painful periods of their life, even women who are in their 70s and 80s have started bleeding again. How dare you say its safe without actually knowing!

She also pointed out that “there is a credible reason to believe that the Covid vaccines will cross-react with the syncytin and reproductive proteins in sperm, ova, and placenta, leading to impaired fertility and impaired reproductive and gestational outcomes,” and that there are enough pregnancy losses reported thus far to warrant stopping the vaccines.

“There have been disturbing reports, ..of increased miscarriages following vaccination. I’m concerned about ... the potential of male infertility which could be permanent. ... it’s merely appropriate caution given the scientific literature.”

An exclusive interview with Dr Roger Hodkinson – “When the history of this madness is written...
